Juveniles Released From
Division of Corrections Juvenile Institutions
Calendar Year 1988

- A total of 775 youth were released from Wisconsin's correctional institutions for juvenile offenders during 1988: 464 boys (59.9 percent) from Ethan Allen School and 247 boys (31.9 percent) and 65 girls (8.4 percent) from Lincoln Hills School. Seven out of 10 boys (72.5 percent) and girls (75.4 percent) were classified as first or rereleases to juvenile aftercare field supervision. Just under one-fifth (16.1 percent) of the boys and one-tenth (10.8 percent) of the girls were directly discharged upon completion of the terms of commitment while less than one-tenth of the boys (3.7 percent) and one-tenth (9.2 percent) of the girls were discharged by order of the juvenile court. Less than one-tenth of the boys (7.2 percent) and girls (4.6 percent) were released following completion of aftercare supervision revocation hearings and two boys (0.3 percent) who were confined under federal commitments were also released. Information about the boys and girls released following the completion of revocation hearings or after supervision as federal commitments has been excluded from Tables 2 through 16. (See Table 1.)

- Seven out of 10 boys (73.8 percent) released during 1988 indicated that they would reside in one of the three regions making up the southern one-third of the state, i.e., the Southern Region (13.7 percent), the Milwaukee Region (45.7 percent), and the Southeastern Region (14.4 percent). Almost three-fifths (58.2 percent) of the girls also intended to live in this area of the state with one-fifth (19.4 percent) planning to live in each of the three regions making up the area. (See Table 2.)

- The average (mean) length of stay for boys released in 1988 was 8.7 months while girls spent an average (mean) of 7.2 months in the institution prior to release. Boys released from Ethan Allen spent less time in the institution with an average (mean) stay of 8.5 months as compared with the 9.0 months stay for boys leaving Lincoln Hills. (See Table 3.)

- Boys released during 1988 had an average (mean) age of 17.2 years while the average (mean) age for girls released was 17.1 years. Boys released from Ethan Allen were slightly older at 17.2 years than those who left Lincoln Hills when the average (mean) age at release was 17.0 years. (See Table 4.)

- Slightly less than one-half of the boys (45.7 percent) and girls (48.4 percent) released in 1988 were from White racial and ethnic backgrounds. (See Table 5.)

- Approximately two-fifths (38.7 percent) of the boys and just over one-fourth (27.4 percent) of the girls were referred for services to Division of Corrections Clinical Services while one-fifth (21.6 percent) of the boys and over one-tenth (12.9 percent) of the girls who had exceptional needs were referred for specialized education programming. Referrals to the SPRITE program were given approximately one-fourth of the boys (23.8 percent) and girls (25.9 percent). (See Table 6.)

- Over one-half of the boys (55.0 percent) and almost one-half (47.5 percent) of the girls referred for services received treatment from Division of Corrections Clinical Services staff prior to release. Services to youth with exceptional educational needs were provided to over one-fourth (27.6 percent) of the boys and less than one-fifth (15.0 percent) of the girls for whom referrals were accepted. The SPRITE program provided services to one-fourth (25.8 percent) of the boys and almost two-fifths (37.5 percent) of the girls who were referred for specialized services. (See Table 7.)

- Approximately one-half (47.5 percent) of the boys and three-fourths (74.2 percent) of the girls spent time in a formal high school education program prior to release. Four youth, two boys and two girls, earned high school diplomas while General Education Development (GED) certificates were earned by 117 boys (17.8 percent) and 9 girls (14.5 percent). (See Table 8.)

- Eight out of 10 boys (83.5 percent) and girls (83.8 percent) participated in basic education during their institution stay. (See Table 9.)

- One-fourth of the boys (26.1 percent) and over one-tenth (14.5 percent) of the girls took part in vocational, technical, or adult education program while at the institution. (See Table 10.)

- Two-fifths (39.6 percent) of the boys and over one-third (35.5 percent) of the girls took part in work programs prior to release. (See Table 11.)

- Almost three-fifths (56.9 percent) of the boys took part in both alcohol and drug treatment programs prior to release. This was also true for one-tenth (9.7 percent) of the girls. (See Table 12.)

- Slightly less than one-half of the boys (46.5 percent) and girls (48.4 percent) were leaving the institutions for placements in foster homes, group homes, or other child caring institutions. (See Table 13.)

- Almost three-fifths of the boys (58.4 percent) and girls (58.1 percent) released during 1988 were to be under state supervision while on aftercare status. (See Table 14.)

- The major delinquent acts for which boys released during 1988 had most frequently been committed to the institutions were unarmed burglary (21.0 percent), auto theft (16.5 percent), and theft (15.9 percent) while girls had most often been institutionalized for theft (22.6 percent), battery (16.1 percent), and auto theft (12.9 percent). Boys released from Ethan Allen were more often committed for some type of robbery (13.2 percent) than those who left Lincoln Hills where three-tenths (30.6 percent) of the boys had originally been sent to the institution because of burglary. (See Table 15.)

- One-half (52.7 percent) of the boys and two-fifths (43.5 percent) of the girls released during 1988 had originally been committed from Milwaukee County. An additional one-fifth (21.5 percent) of the boys were committed from Racine (48 cases), Dane (34 cases), Kenosha (24 cases), Outagamie (18 cases), and Rock (17 cases) Counties while an additional one-third (32.1 percent) of the girls were originally committed from Racine County (5 cases) and Dane, Fond du Lac, Kenosha, Marathon, and Winnebago Counties each with three commitments. (See Table 16.)

Residents in Wisconsin
Adult Correctional Facilities
on December 31, 1988

- Eight-tenths (79.8 percent) of the males and nine-tenths (89.1 percent) of the females in residence in Wisconsin's correctional facilities for adult offenders on December 31, 1988, were classified as new admissions. This category includes offenders received with new sentences, probation violators with or without new sentences, and juvenile aftercare violators sentenced as new adult offenders. (See Table 1, pps. 1-3, pps. 29-30.)

- Over one-half of the males (54.8 percent) and females (51.7 percent) were from White racial and ethnic backgrounds. Blacks made up more than one-third (36.9 percent) of the male and just over two-fifths (42.3 percent) of the female resident population. (See Table 2, p.4, p.31.)

- Unarmed burglary (21.7 percent), armed robbery (9.9 percent), and first degree sexual assault (8.5 percent) were the major offenses most often reported for male residents. Female residents had most often been institutionalized for forgery (17.6 percent), theft (12.4 percent), and other drug violations (7.9 percent). (See Table 3, pps. 5-7, pps. 32-33.)

- About three-fifths (57.6 percent) of the males and two-fifths (39.7 percent) of the females were classified as assaultive offenders either singly or in combination with sex and /or drug offenses. Males classified as sex offenders either alone or in conjunction with drug and/or assaultive offenses made up one-fifth (20.1 percent) of the population; a fact that was true for less than one-tenth (4.5 percent) of the females in residence. One-tenth of the males (9.5 percent) and females (10.5 percent) were classified either singly or in combination with assaultive and/or sex offenses as drug offenders. One-third (35.1 percent) of the males and almost one-half (48.7 percent) of the females were classified solely as property offenders. (See Table 4, p.8, p.34.)

- The average (mean) length of sentence for males was 10.7 years; for females, 7.0 years. Three hundred sixty-six males and 19 females serving life sentences were excluded from these computations. (See Table 5, p.9, p.35.)

- Almost two-fifths of the males (37.3 percent) and females (37.1 percent) were committed to the institutions from Milwaukee County. An additional one-fourth (25.2 percent) of the males and three-tenths (30.7 percent) of the females were committed from Dane, Kenosha, Racine, and Rock Counties. (See Table 6, pps. 10-14, pps. 36-38.)

- Males were found to have an average (mean) age of 30.5 years while females were slightly older with an average (mean) age of 31.8 years. (See Table 7, p.15, p.39.)

- Over one-half (55.5 percent) of the males as compared with approximately two-fifths (44.2 percent) of the females were born in Wisconsin. (See Table 8, p.16, p.40.)

- The majority of the males (79.3 percent) and females (68.9 percent) in residence were found to be free of physical, developmental, or emotional disabilities. (See Table 9, p.17, p.41.)

- About one-fifth of the males (18.0 percent) and seven females (2.6 percent) had a record of military service. (See Table 10, p.18, p.42.)

- One-third (32.3 percent) of the males and almost two-fifths (37.1 percent) of the females had completed at least ninth grade but had not earned a high school diploma. High school diplomas or GED or HED certificates were held by over two-fifths (45.5 percent) of the males and three-tenths (29.2 percent) of the females. (See Table 11, p.19, p.43.)

- One-fifth (21.4 percent) of the males and three-tenths of the females (30.3 percent) were found to be achieving at a tested grade level of twelfth grade or more. (See Table 12, p.20, p.44.)

- Males in residence had been institutionalized for an average (mean) of 26.8 months; females, for 20.9 months. (See Table 13, p.21, p.45.)

- One-third (33.7 percent) of the males in residence were classified as in need of close or maximum security, about two-fifths (38.0 percent) as medium or medium out, and about one-fifth (22.7 percent) as minimum. Approximately one-fourth (26.2 percent) of the females were found to be in need of maximum security with the remainder of the classified females divided evenly between medium or medium out and minimum (31.8 percent). Note: The presence of individuals with maximum and medium security ratings in minimum security facilities is due to a time lag in reporting changes to the reporting system. (See Table 14, p.22, p.46.)

- Three-fifths of the males (59.7 percent) and almost one-half of the females (46.4 percent) were considered to be in at least moderate need of treatment for problems relating to the use of alcohol. Information was obtained from the inmate needs assessment system. (See Table 15, p.23, p.47.)

- A moderate or serious need for treatment for problems relating to drug usage was noted for three-fifths (58.8 percent) of the males and two-thirds (65.9 percent) of the females in residence. Information was obtained from the inmate needs assessment system. (See Table 16, p.24, p.48.)

- Eight out of 10 males (79.5 percent) and females (77.9 percent) in residence were found to have problems relating to the use of alcohol and/or other drugs. (See Table 17, p.25, p.49.)

- There was at least a moderate need for mental health services for one-fifth (20.2 percent) of the males and three-tenths (31.1 percent) of the females in residence. Information was obtained from the inmate needs assessment system. (See Table 18, p.26, p.50.)

- Records indicate that over one-half (53.5 percent) of the males and three-fifths (60.7 percent) of the females were in at least moderate need of some type of educational programming. Information was obtained from inmate needs assessment system. (See Table 19, p.27, p.51.)

- Eight out of 10 males (79.3 percent) and females (82.4 percent) were found to have a moderate or greater need for some kind of vocational training. Information was obtained from the inmate needs assessment system. (See Table 20, p.28, p.52.)

Residents in Wisconsin
Adult Correctional Facilities
on June 30, 1989

- The majority of the males (79.4 percent) and females (89.9 percent) resident in Wisconsin's correctional facilities for adult offenders on June 30, 1989, were classified as new sentences. This category includes offenders received with new sentences, those admitted as probation violators either with or without new sentences, and those sentenced as new adult offenders following revocation of juvenile aftercare supervision. (See Table 1, p. 1-3, pps. 29-30.)

- White males made up over one-half (53.8 percent) of the population while just under two-fifths (37.7 percent) of the males were Black. Approximately one-half (49.1 percent) of the females were White with almost an identical proportion (46.4 percent) reported to be Black. (See Table 2, p. 4, p. 31.)

- The major offenses for which males in residence had most often been sentenced were unarmed burglary (20.6 percent), armed robbery (9.7 percent), and first degree sexual assault (8.4 percent). Females were most often sentenced for forgery (14.6 percent), theft (13.1 percent), and other drug violations (9.7 percent). (See Table 3, pps. 5-7, pps. 32-33.)

- Almost three-fifths (57.8 percent) of the males and two-fifths (41.9 percent) of the females were classified either solely as assaultive offenders or as assaultive offenders who were also sex and/or drug offenders. (See Table 4, p. 8, p. 34.)

- The average (mean) length of sentence for males in residence was 10.7 years while females were serving an average (mean) sentence of 6.8 years. Offenders serving life sentences, 381 males and 20 females, were excluded from these computations. (See Table 5, p. 9, p. 35.)

- Approximately two-fifths of the males (37.2 percent) and females (36.7 percent) in residence were committed from Milwaukee County. Commitments from Dane, Kenosha, Racine, and Rock Counties accounted for one-fourth (25.7 percent) of the males and one-third (33.0 percent) of the females in residence. (See Table 6, pps. 10-14, pps. 36-38.)

- Males, with an average (mean) age of 30.6 years, were slightly younger than females who were an average (mean) of 32.3 years old. (See Table 7, p 15, p. 39.)

- Over one-half (55.3 percent) of the males and just under one-half (48.3 percent) of the females were born in Wisconsin. (See Table 8, p. 16, p. 40.)

- Eight out of 10 males (78.3 percent) and 7 out of 10 females (68.5 percent) were found to be without physical, emotional, or developmental disabilities. (See Table 9, p. 17, p. 41.)

- Less than one-fifth (17.8 percent) of the males and five females (1.9 percent) had a record of military service. (See Table 10, p. 18, p. 42.)

- Slightly less than one-half (45.4 percent) of the males and three-tenths (30.0 percent) of the females held high school diplomas or GED or HED certificates. A record of some college training was noted for almost one-fifth (18.7 percent) of the females and less than one-tenth (8.3 percent) of the males. (See Table 11, p. 19, p. 43.)

- A tested grade level of twelfth grade or more was noted for over one-fifth (22.3 percent) of the males and over one-fourth (28.5 percent) of the females. (See Table 12, p. 20, p. 44.)

- Males in residence on June 30, 1989, had an average (mean) stay of 26.8 months; females, an average (mean) stay of 19.8 months. Almost one-fourth (23.8 percent) of the males and one-third (33.3 percent) of the females had been institutionalized for less than one year. (See Table 13, p. 21, p. 45.)

- Males classified as close or maximum custody made up about one-third (34.0 percent) of the population, almost two-fifths (37.1 percent) were classified as medium or medium out, and approximately one-fourth (24.1 percent) were classified as minimum. One-fourth (25.5 percent) of the females were classified as maximum, another fourth (26.2 percent) as medium or medium out, and two-fifths (41.2 percent) as minimum. (Note: The presence of individuals with maximum or medium security classifications in minimum security institutions is due to a time lag in reporting changes to the information system. (See Table 14, p. 22, p. 46.)

- Three-fifths (59.8 percent) of the males and over two-fifths (44.65 percent) of the females were found to have moderate or serious needs for treatment of problems relating to the use of alcohol. Information was obtained from the inmate needs assessment system. (See Table 15, p. 23, p. 47.)

- A moderate or serious need for treatment of drug problems was noted for two-fifths of the males (60.7 percent) and females (62.2 percent) in residence. Information was obtained from the inmate needs assessment system. (See Table 16, p. 24, p. 48.)

- Eight out of 10 males (80.6 percent) and three-fourths (74.9 percent) of the females were found to have need for treatment of problems relating to the usage of alcohol and/or other drugs. Information was obtained from the inmate needs assessment system. (See Table 17, p. 25, p. 49.)

- A need for some type of treatment for problems connected with mental health was noted for one-fifth (19.5 percent) of the males and over one-fourth (27.0 percent) of the females in residence. Information was taken from inmate needs assessment system. (See Table 18, p. 26, p. 50.)

- Over one-half (53.2 percent) of the males and three-fifths (61.8 percent) of the females were found to be in need of at least moderate involvement in educational programming. Information was taken from the inmate needs assessment system. (See Table 19, p. 27, p. 51.)

- The majority of the males (78.5 percent) and females (77.5 percent) were found to have at least a moderate need for some type of vocational training. This information was obtained from the inmate needs assessment system. (See Table 20, p. 28, p. 52.)

FISCAL YEAR SUMMARY REPORT OF POPULATION MOVEMENT

1989

Wisconsin's Division of Corrections is responsible for (1) the operation of correctional facilities for adult and juvenile offenders and (2) the supervision of offenders residing in the community under the terms and conditions of probation, parole, mandatory release, special action early release, and juvenile aftercare supervision. This publication, which is a compilation of the monthly Statistical Bulletin C-59, Report of Wisconsin Corrections Population, is designed to provide information about the volume and movements of offenders under Division of Corrections supervision during the fiscal year ending June 30, 1989.

Fiscal year average daily populations and movements into and out of correctional institutions for adult offenders are presented in Table 1. The columns labeled "Contr. fac." include information for offenders serving Wisconsin sentences under contractual arrangements in Wisconsin county jails and in correctional institutions operated by the Federal Bureau of Prisons. Table 1 does not include information about offenders confined at the Wisconsin Resource Center, an institution operated by the Division of Care and Treatment Facilities.

Table 2 includes information about average daily populations and movements into and out of Ethan Allen and Lincoln Hills Schools, the state's correctional institutions for juvenile offenders. Data about the youth aids program for fiscal year 1989 is presented in Table 2-A.

Information about the average daily populations and movements of offenders residing in the community under field supervision is included in Table 3. Data about offenders who absconded from or were returned to field supervision during fiscal year 1989 appears in Table 4.

For those interested in trend data the average daily populations for community supervision and institution cases for the fiscal years 1985 through 1989 are shown in Table A. Information for absconders from field supervision is not included in this table.

Table A

Community Supervision Cases and Institution Cases by Type of Case
Average Daily Populations
Fiscal Years 1985 - 1989

Average Daily Populations															
Fiscal Year	Total DOC Average Daily Population	Total Community Services Cases	Total Probation	Adult	Youthful Offender	Juvenile	Interstate Compact	Total Parole	Adult	Youthful Offender	Juvenile Aftercare	Interstate Compact	* Total Institution Cases	Adult	Juvenile
1985	28,897	23,658	20,105	19,598	8	-	499	3,553	3,197	1	155	200	5,239	4,734	505

1988	32,420	26,115	22,333	21,740	3	-	590	3,782	3,385	-	167	230	6,305	5,781	524
1989	33,359	26,829	22,981	22,343	1	-	637	3,848	3,457	-	163	228	6,530	6,006	524

* Average daily populations for the Wisconsin Resource Center, operated by the Division of Care and Treatment Facilities, have been excluded from this table. Average daily populations for WRC for fiscal years 1985 - 1989 were 78, 149, 160, 161, and 159.

On June 30, 1989, the Division of Corrections was responsible for the supervision of 39,581 offenders; an increase of 6.4 percent over the 37,207 under supervision on June 30, 1988. The number of offenders resident in correctional facilities for adults rose from 5,790 at the start to 6,232 at the end of the fiscal year; an increase of 7.6 percent. The population in correctional institutions for juvenile offenders increased 7.0 percent from 511 on July 1, 1988 to 547 on June 30, 1989. Adults and juveniles reported in footnote a, Tables 1 and 2, as being absent with leave are not included in these figures. The number of offenders under some type of supervision in the community rose from 27,013 at the start to 28,388 at the end of the fiscal year; an increase of 5.1 percent (see Table 3). The number of community supervision cases on absconder status increased 13.4 percent from 3,893 on July 1, 1988 to 4,414 on June 30, 1989.

During fiscal year 1989 the average daily population of offenders under Division of Corrections supervision was 33,359; an increase of 15.4 percent over the average daily population of 28,897 reported during fiscal year 1985. The average daily population of offenders under probation supervision rose steadily from 20,105 in fiscal year 1985 to 22,981 in fiscal year 1989; an increase of 14.3 percent. Adult probation average daily populations increased 14.0 percent during the five-year period while the average daily population of probationers supervised under interstate compact agreements increased 27.7 percent from 499 in 1985 to 637 in fiscal year 1989. The overall average daily population of offenders under some type of parole supervision increased 8.3 percent from 3,553 in 1985 to 3,848 in 1989. The adult offender average daily parole population in fiscal year 1989 was 3,457; a high for the five-year period and an increase of 2.1 percent over the previous fiscal year when the average daily population was 3,385.

The juvenile aftercare average daily population, which was at a five-year high of 190 in fiscal year 1987 decreased to 163 in fiscal year 1989; a decline of 14.2 percent. It should be noted that the absence of juveniles under probation supervision is due to a Department of Health and Social Services policy decision to discontinue the provision of such services on a state level. The almost total absence of youthful offenders is attributable to the repeal of the Youthful Offender statute which became effective on July 1, 1978.

Correctional institution average daily populations rose steadily from 5,239 in fiscal year 1985 to 6,530 in fiscal year 1989; an increase of 24.6 percent. The greater part of the increase was in institutions for adult offenders where the average daily population rose steadily from 4,734 in fiscal year 1985 to 6,006 in fiscal year 1989; an increase of 26.9 percent. For the second year in a row, juvenile institutions' average daily populations remained at 524.

Table 1. Facilities for Adults

/a Excludes 340 males: 2-psychiatric facilities; 4-medical hospitals; 31-court; 10-jail; 71-other jurisdictions; 160-Wisconsin Resource Center; 1-leave 8-other temporary absence; 31-escapee, at large; 22-escapee, apprehended.

Excludes 18 females: 1-medical hospital; 4-court; 3-other jurisdictions; 9-escapee, at large; 1-escapee, apprehended.

/b Excludes 52 status changes for males held pending revocation hearings; 1-new sentence, adult parole violator; 2-new sentence, adult mandatory release violatory; 1-no new sentence, adult probation violator; 7-no new sentence, adult parole violator; 35-no new sentence, adult mandatory release violator; 6-no new sentence, special action early release violator.

Excludes 3 status changes for females held pending revocation hearings: 1-no new sentence, adult probation violator; 1-no new sentence, adult adult mandatory release violator; 1-no new sentence, special action early release violator.

/c Excludes 280 status changes for males out on temporary absence: 7-first release, adult parole violator; 36-first release, adult mandatory release violator; 1-first release, special action early release violator; 2-first release, direct discharge; 14-first release, discharge court order; 2-first release, death; 7-rerelease, adult mandatory release; 4-rerelease, direct discharge; 2-rerelease, discharge court order; 1-rerelease, death; 1-release after completion of adult parole revocation hearing; 2-release after completion of adult probation revocation hearing; 86-transfer to maximum security facility; 13-transfer to medium security facilit; 17-transfer to minimum security facility; 1-transfer to contract facility; 12-authorized absence; 72-unauthorized absence.

Excludes 20- status change for females out on temporary absence: 2-first release, adult parole; 1-first release, special action early release; 1-first release, discharge court order; 8-transfer to maximum security facility; 8-unauthorized absence.

Table 2. Juvenile Institutions

/a Excludes 50 juvenile males absent: 1-psychiatric facility; 10-furlough; 19-trial foster home; 6-SPRITE; 1-jail; 3-other jurisdictions; 9-over stayed leave; 1-unauthorized absence.

Excludes 5 juvenile females absent: 1-trial foster home; 3-other jurisdictions; 1-over-stayed leave.

/b Excludes 147 status changes for juvenile males held pending revocation hearings: 133-return from state aftercare; 12-return TRY from program; 2-return from WMHI program.

Excludes 8 status changes for juvenile females held pending revocation hearing: 5-return from state aftercare; 3-return TRY from program.

c Excludes 441-status changes for juvenile males out on temporary absence: 174-first release, state aftercare; 73-first release, county aftercare; 1-first release, WMHI program; 14-first release, direct discharge; 10-first release, discharge court order; 42-rerelease,state aftercare; 6-rerelease, county aftercare; 8-rerelease, direct discharge; 3-rerelease,discharge court order; 4-release after completion of state aftercare supervision revocation hearing; 11-transfer to juvenile institution; 30-authorized absence; 65-overstayed-leave.

Excludes 53 status changes for juvenile females out on temporary absence: 12-first release, state aftercare; 10-first release,county aftercare; 1-first release, TRY program; 5-first release, discharge court order; 7-rerelease, state aftercare; 2-rerelease, county aftercare; 1-rerelease, direct discharge; 1-rerelease, discharge court order; 4-authorized absence; 10-over-stayed leave.

Footnotes
(Concluded)

DCI-REC - Dodge Correctional Institution, Reception Center
DCI-PROP - Dodge Correctional Institution, Institution Proper
WCI - Waupun Correctional Institution
GBCI - Green Bay Correctional Institution
CCI - Columbia Correctional Institution, opened May 14, 1986
FLCI - Fox Lake Correctional Institution
KMCI - Kettle Moraine Correctional Institution
OSCI - Oshkosh Correctional Institution, opened September 10, 1986
OCI - Oakhill Correctional Institution
WCCS-North - Wisconsin Correctional Center System-Northern Sector. Created effective July 1, 1985, WCCS-North includes (1) Gordon, Black River, McNaughton, Sanger B. Powers, Winnebago, and Flambeau Centers from the Wisconsin Correctional Camp System, (2) St. Croix Center, previously a part of the Bureau of Community Corrections, and (3) the Drug Abuse Center, formerly the Corrections Drug and Alcohol Treatment Center.
WCCS-South - Wisconsin Correctional Center System-Southern Sector. Created effective July 1, 1985, includes Oregon and Thompson, both formerly units of the Wisconsin Correctional Camp System, and the Marshall E. Sherrer, Abode, St. John's and Women's Centers, all previously units within the Bureau of Community Corrections. Baker House was also included in the Southern Sector from July 1,1985 to December 26, 1985. Minimum Security Bunkhouse became part of WCCS-South on July 1, 1987.
Contract Facilities- Includes Minnesota correctional institutions (Stillwater, St.Cloud, and Oak Park Heights), Milwaukee County House of Corrections, Wisconsin county jails, Ferris Center (Dane County Huber Law Facility), and federal institutions in which Wisconsin inmates are housed under contract.
TCI - Taycheedah Correctional Institution

Security Level - Maximum security facilities include DCI, WCI, GBCI, CCI, and TCI. Medium security facilities include FLCI, KMCI, and OSCI. Minimum security facilities include OCI and North and South WCCS.
EAS Ethan Allen School
LHS - Lincoln Hills School
WMHI - Winnebago Mental Health Institute
W/O - Without
Prob. - Probation
Par. - Parole
M. R. - Mandatory Release
Y. O. - Youthful Offender

Residents in Wisconsin
Juvenile Correctional Institutions
on December 31, 1988

- Five hundred and thirty youths were in residence at Wisconsin's correctional institutions for juvenile offenders on December 31, 1988: 330 boys at Ethan Allen School and 170 boys and 30 girls at Lincoln Hills School. The majority (81.8 percent) of the residents were classified as new commitments. Youths reinstitutionalized following revocation of aftercare supervision (15.4 percent), returns pending the outcome of aftercare supervision revocation hearings (3.2 percent) and those being supervised for the federal government (0.4 percent) made up the remainder of the population. (See Table 1.)

- One-half of the boys (48.9 percent) and just over one-half of the girls (53.3 percent) were Black. (See Table 2.)

- Milwaukee County committed slightly more than one-half (51.8 percent) of the boys and two-fifths (43.3 percent) of the girls in residence. (See Table 3.)

- Boys had most often been involved in auto theft (17.6 percent), unarmed burglary (16.4 percent), and theft (13.4 percent) just prior to admission. Battery (30.0 percent), theft (23.3 percent), and resisting arrest (10.0 percent) were the major delinquent acts for which girls were most often committed. (See Table 4.)

- Difficulties with assaultiveness, either alone or in combination with other problem behaviors, were noted for three-fifths (60.4 percent) of the boys and almost three-fourths (73.4 percent) of the girls. One-third (33.0 percent) of the boys and slightly more than one-half (53.3 percent) of the girls with alcohol and/or other drugs either alone or in conjunction with other types of problems. Percentages were derived by totaling all categories in which a behavior, assaultiveness for example, was present. (See Table 5.)

- Boys, with an average (mean) age of 16.2 years, were slightly older than girls who had an average (mean) age of 15.9 years. Boys at Ethan Allen School were somewhat older, 16.3 years, than those at Lincoln Hills School where the average (mean) age for boys was 16.1 years. (See Table 6.)

- Approximately one-half (47.4 percent) of the boys and one-third (33.3 percent) of the girls were found to be free from physical, developmental, or emotional disabilities. Less than one-fifth (16.1 percent) of the boys at Ethan Allen School had some type of physical disability; a fact that was true for only one boy in residence at Lincoln Hills School. (See Table 7.)

- Approximately one-fourth (26.6 percent) of the boys and about one-third (30.0 percent) of the girls had completed the eighth grade and over one-third (35.8 percent) of the boys and just over one-fourth (26.7 percent) of the girls had finished the ninth grade. Three boys in residence at Lincoln Hills School had earned high school diplomas. (See Table 8.)

° Just under one-half (47.2 percent) of the boys and one-tenth (10.0 percent) of the girls were found, after testing, to rank at or above the ninth grade level. About the same proportion of boys (46.6 percent) and three-fourths (76.6 percent) of the girls were achieving at or less than the eighth grade level. No information was available for the remainder of the boys (6.2 percent) and girls (10.0 percent). (See Table 9.)

° About one-half (48.0 percent) of the boys and slightly less than three-fifths (56.7 percent) of the girls in residence were considered to be at or above normal intelligence levels. Almost two-thirds (64.2 percent) of the boys at Ethan Allen School as contrasted with less than one-fifth (15.9 percent) of those at Lincoln Hills School were at less than normal intelligence levels. (See Table 10.)

° Boys, as a group, had been in residence for an average (mean) of 6.2 months; girls for 5.6 months. The average (mean) length of stay for boys in residence at Lincoln Hills School, 6.7 months, was longer than at Ethan Allen School where boys were found to have been institutionalized for an average (mean) of 6.0 months. (See Table 11.)

Offenders Released From
Wisconsin Adult Correctional Institutions
Calendar Year 1988

HIGHLIGHTS

- Wisconsin's correctional institutions for adult offenders reported the release of 2,723 persons, 2,526 males and 197 females, during calendar year 1988. Offenders classified as first releases accounted for seven-tenths (72.5 percent) of the group, rereleases just over one-fifth (22.0 percent) of the group, and the remainder were offenders released following completion of a revocation hearing, after completion of alternative to revocation placement, or for other reasons. (See Table 1.)

- Nine out of 10 offenders (88.2 percent) released during 1988 left the institutions for supervision in the community on parole (29.5 percent) or mandatory release (70.5 percent) status. The remainder of the releases were discharged at completion of sentence (5.0 percent), discharged by court order (1.1 percent), released after alternative to revocation admission (5.1 percent), or for other reasons (0.6 percent). (See Table 2.)

- Unarmed burglary (26.0 percent), theft (8.2 percent), and armed robbery (7.4 percent) were the offenses for which males first and rereleased in 1988 had most frequently been sentenced. Females were most often sentenced for forgery (23.8 percent), theft (16.6 percent), and other drug violations (12.4 percent). (See Table 3.)

- The average (mean) length of sentence for all offenders released during 1988 was 61.8 months: males were serving average (mean) sentences of 63.3 months; females, 44.4 months. Five males serving life sentences were excluded from these computations. Almost one-half (46.3 percent) of the males and just under three-fifths (58.5 percent) of the females were serving sentences of less than four years. (See Table 4.)

- Four out of 10 males (38.2 percent) and females (42.0 percent) were committed from Milwaukee County. Dane, Kenosha, Racine, and Rock Counties had committed three-tenths (30.5 percent) of the females and one-fourth (24.2 percent) of the males released in 1988. (See Table 5.)

- The average (mean) length of stay since most recent admission for all offenders released in 1988 was 23.8 months. Males had spent an average (mean) of 24.4 months in the institution; females, an average (mean) of 17.5 months. (See Table 6.)

- Offenders rereleased in 1988 had spent, since last new admission, an average (mean) of 58.8 months in the institution. Males spent an average (mean) of 59.6 months; females, 34.2 months. (See Table 7.)

- Seven out of 10 males (74.0 percent) and eight out of 10 females (83.3 percent) rereleased during 1988 had a record of one prior release since last new admission. (See Table 8.)

- Over one-half (53.1 percent) of the males and two-fifths (40.4 percent) of the females were reported to be White. (See Table 9.)

- Property offenders made up one-half (49.8 percent) of the male and three-fifths (59.6 percent) of the female releases. One-fourth (26.9 percent) of the males were regarded as solely assaultive offenders while over one-tenth (12.1 percent) were classified as both assaultive and sex offenders. Less than one-fifth (20.2 percent) of the females were categorized solely as assaultive offenders while seven females (3.6 percent) were considered as both assaultive and sex offenders. One-tenth of the releases, 9.6 percent of the males and 14.5 percent of the females, were classified as drug offenders. (See Table 10.)

- Less than one-tenth (6.4 percent) of the males and eight (4.1 percent) of the females were turned over at release to authorities from other jurisdictions because of outstanding detainers. (See Table 11.)

- About one-fifth (18.5 percent) of the males and one-fourth (25.9 percent) of the females participated in an adult basic education program prior to release. (See Table 12.)

- Participation in programs leading to GED or HED certificates was noted for about one-fifth of the males (18.9 percent) and females (19.2 percent) released in 1988. (See Table 13.)

- Three-fourths (75.6 percent) of the males and four-fifths (84.5 percent) of the females did not take part in a high school education program while incarcerated. High school diplomas were earned by 19 males and 2 females prior to release. (See Table 14.)

- Three out of 10 males (29.8 percent) and females (35.2 percent) took part in programs designed to assist them in dealing with problems relating to the usage of alcohol and/or other drugs. (See Table 15.)

- One-fifth (21.9 percent) of the males and somewhat less than one-fifth (15.5 percent) of the females participated in work release programs during incarceration. (See Table 16.)

- Thirty-seven males (1.6 percent) and nine females (4.6 percent) participated in study release. (See Table 17.)

- One-fourth (24.2 percent) of the males and less than one-tenth (7.3 percent) of the females were enrolled in a vocational and/or apprenticeship program prior to release. (See Table 18.)

- Participation in a college level education program was noted for 100 males (4.2 percent) and 17 females (8.8 percent). (See Table 19.)

- Males serving sentences for unarmed burglary, theft, and other drug violations, which were the crimes for which males first-released in 1988 had most often been sentenced, spent an average (mean) of 24.0, 18.1, and 16.0 months respectively in the institution. First-released females, who were most often sentenced for forgery, theft, and other drug violations spent an average (mean) of 18.8, 15.5, and 13.9 months in the institution. (See Table 20.)

- Males serving sentences for the most common offenses among those rereleased in 1988 (unarmed burglary, armed robbery, and forgery) served an average (mean) of 18.6, 25.7, and 15.0 months between the time of reinstitutionalization and release. Females serving sentences for theft, unarmed burglary, and unarmed robbery spent an average (mean) of 15.3, 14.7, and 10.5 months in the institution prior to rerelease. (See Table 21.)

- Males first-released in 1988 who were serving five year sentences spent an average (mean) of 30.3 months in the institution while female first-releases with the same sentence served an average (mean) of 26.3 months prior to release. (See Table 22.)

- Males and females with five year sentences who were previously released and returned to the institution following revocation of field supervision spent an average (mean) of 12.0 and 10.0 months in the institution prior to rerelease in 1988. (See Table 23.)

- Nine-tenths (88.0 percent) of the males and three-fourths of the females (76.2 percent) planned to take up residence somewhere in Wisconsin. The remainder of the releases, with the exception of three males who planned to live in a foreign country, intended to take up residence elsewhere in the United States. (See Table 24.)

The graphs on the following pages present a variety of information about releases from Wisconsin's correctional institutions for adult offenders during the years 1969 through 1988.

The first graph indicates that the total number of releases added up to 1,730 in 1971 and dropped to 931 in 1974 which was a low for the 19-year period. After 1974 releases generally increased reaching a high of 2,712 in 1988; an increase of 191.3 percent. Male releases closely resembled the total release trend with the low at 879 in 1974 and the high at 2,517 in 1988. Female releases generally remained stable during the 19-year period with a low of 52 in 1974 increasing gradually to a high of 195 in 1988.

The second graph indicates that the number of males released on parole peaked at 1,140 in 1972 and generally took a downward trend reaching a 19-year low of 434 in 1988. Conversely, the number of males leaving institutions on mandatory release status remained below 400 during 1969-1976 and rose to a high of 1,638 in 1988.

Graph 3 indicates that females released to parole supervision reached a high of 104 in 1971, declined dramatically to 33 in 1980, and after rising to 76 in 1984 and 1985, dropped to the 19-year low of 30 in 1986 before increasing to 56 in 1988. Mandatory releases showed a generally upward trend from a low of 9 in 1976 to the high of 56 in 1988.

Graph 4 shows releases from maximum, medium, and minimum security institutions. The number of offenders released from maximum security institutions rose rather consistently from a low of 392 in 1974 to a high of 969 in 1988. Releases from medium security institutions dropped to a low of 104 in 1974 and then remained relatively stable prior to increasing to a high of 333 in 1988. Since 1974 more offenders have been released each year from minimum security institutions than from any other security level. The number of releases from this type of facility rose steadily from a low of 423 in 1973 to a high of 1,538 in 1984 and has continually fluctuated since that time.

The final graph displays average (mean) length of stay by sex. The overall length of stay, which was 19.7 months in 1969, increased to 22.9 months in 1972 and decreased again to 21.2 in 1974-75 rising to the all-time high of 25.3 months in 1983. The length of stay then declined to 21.7 months in 1986 only to rise again to 23.8 months in 1988. The average (mean) length of stay for males closely paralleled the overall figures showing a low of 20.4 months in 1969 and a high of 25.7 months in 1981. The length of stay for males in 1988 was 24.4 months. The length of stay for females generally showed an upward trend ascending from a low of 10.3 months in 1969 to a high of 21.2 months in 1979, a decade later. An average length of stay of 17.5 months was reported for females released in 1988.

Residents in Wisconsin
Juvenile Correctional Institutions
on June 30, 1989

- On June 30, 1989, a total of 547 youths were in residence at Wisconsin's correctional institutions for juvenile offenders: 309 boys at Ethan Allen School and 208 boys and 30 girls at Lincoln Hills School. The majority of the residents (83.0 percent) were classified as new commitments, just over one-tenth (13.4 percent) as returns following the revocation of aftercare supervision, while the remainder had been institutionalized pending the outcome of aftercare supervision revocation hearings (3.5 percent) or were being supervised for the federal government (0.2 percent). (See Table 1.)

- Boys and girls from minority racial and ethnic backgrounds made up three-fifths (59.9 percent) of the resident population. (See Table 2.)

- Over one-half (52.2 percent) of the boys and one-third (33.3 percent) of the girls were committed to the institutions from Milwaukee County. (See Table 3.)

- The major delinquent acts in which boys had been involved just prior to admission were unarmed burglary (18.4 percent), auto theft (17.6 percent), and battery (11.6 percent). Girls were most often committed for battery (20.0 percent), auto theft (16.7 percent), and theft (13.3 percent). (See Table 4.)

- Problems with assaultiveness either alone or in combination with other types of problem behaviors were noted for over one-half (52.1 percent) of the boys and two-thirds (66.7 percent) of the girls. One-third (32.2 percent) of the boys and over one-half (53.3 percent) of the girls were found to have difficulties with alcohol and/or other drugs either singly or in conjunction with other problem areas. Just over one-tenth (12.7 percent) of the boys and one-fifth (20.0 percent) of the girls were found to have difficulties with sexual behavior. Percentages were derived by totaling all categories in which a behavior, assaultiveness for example, was present. (See Table 5.)

- Boys, with an average (mean) age of 16.2 years, were somewhat older than girls who were found to have an average (mean) age of 15.7 years. (See Table 6.)

- Two-thirds (67.1 percent) of the boys and three-fifths (60.0 percent) of the girls were found to be free of any physical, developmental, or emotional disabilities. Only 10 boys, 1.8 percent of the population, were found to have some type of physical disability. (See Table 7.)

- One-fifth (21.1 percent) of the boys and over one-fourth (26.7 percent) of the girls had completed the eighth grade while more than one-third (35.2 percent) of the boys and two-fifths (40.0 percent) of the girls had finished the ninth grade. There were no high school graduates in the resident population; however, 10 boys had earned GED or HED certificates. (See Table 8.)

- Educational testing found that just under one-half of the boys (48.9 percent) and over four-fifths (83.3 percent) of the girls were achieving at or below the eighth grade level. Over two-fifths (44.5 percent) of the boys and one-tenth (9.9 percent) of the girls were found to rank at or above the ninth grade level. (See Table 9.)

- Intelligence estimates indicate that six out of 10 boys (64.0 percent) and over one-half (56.6 percent) of the girls were at or above normal intelligence levels. Two-fifths (39.8 percent) of the boys at Ethan Allen School as contrasted with less than one-fifth (16.4 percent) of those at Lincoln Hills School were found to be at less than normal intelligence levels. (See Table 10.)

- The average (mean) length of stay for all boys in residence was 6.0 months while girls had been institutionalized for an average (mean) of 5.2 months. Boys in residence at Lincoln Hills School had spent an average (mean) of 6.5 months in the institution as contrasted with Ethan Allen School where the average (mean) length of stay was 5.7 months. (See Table 11.)
